# LASERPATH

CAD-to-Laser Projection Software.

LaserPath turns your CAD files into laser-accurate projection templates instantly.

- + Eliminate error prone tape measurements.
- + End manual alignment.
- + Precise, efficient builds, every time.

**From Hours to Minutes.  
From Guesswork to Precision.**

## SEAMLESS USER EXPERIENCE

- + Converts STEP, DXF, and DWG files.
- + Generate projection-ready laser files in seconds, not hours.
- + Start production faster. Deliver with confidence.

## BUILT FOR FLEXIBILITY

- + Create full projection files for production workflow or click and project in real time.
- + Chain up to 8 lasers for largescale or complex layouts.
- + Adapt instantly to revisions. Keep workflow moving.

## VISUAL ASSEMBLY GUIDANCE

- + Project patterns and text directly on your surface.
- + Reduce setup time for jigs and fixtures on any project.
- + Prevent misplacements and build errors with real-time, on-part data.
- + Work smarter. No paper, no prints, no ambiguity.
