

CONTROL SOFTWARE SOLUTION

ALIGN 4.0

Multitasking Control, Ready for Industry 4.0

Align 4.0 connects design, operators, and laser systems in one seamless flow. One flexible platform replaces multiple controllers and software seats, reducing costs, cutting setup time, and keeping operators focused on productive work.

FASTER STARTS, LOWER COSTS

- + Run up to 8 jobs simultaneously on a single control computer.
- + Reduce hardware, footprint, and maintenance with streamlined setup.
- + Eliminate extra controllers and software licenses.

OPERATORS STAY AT THE TOOL

- + Step-by-step electronic instructions delivered to smart mobile devices.
- + Familiar CAD-like interface with 3D images and part viewer window.
- + Automatic inspection triggers start exactly when required.

MULTITASKING THAT SCALES

- + Support up to 20 projectors from one system.
- + AutoAlign for rapid registration and SystemAlign for multi-projector setups.
- + Oriented display mirrors the operator's tool view for clarity.

RELIABILITY BUILT IN

- + Powered by industrial-grade PC on Windows OS.
- + Import layup sequences for fast, accurate setup.
- + Backed by a 2-year warranty with unlimited direct phone and email support.

PLUG INTO INDUSTRY 4.0

- + Open-platform system supports master CSV and multiple file formats.
- + Plug-and-play PLC interface for seamless factory integration.
- + Compatible with Fibersim, Catia, TruLASER, Verisurf, metrology, CAD & NC data.
